Projects

Portfolio Website

Technologies Used: HTML, CSS
Description:

- Designed and developed a fully responsive personal portfolio website to showcase skills, projects, and career highlights.
- Implemented modern layout techniques using **Flexbox** and **CSS Grid** to ensure responsiveness across devices (mobile, tablet, desktop).
- Included sections like Home, About Me, Skills, Projects, and Contact using only HTML and CSS without any external frameworks.
- Used **CSS media queries** for adaptive styling and clean, organized structure for code readability.
- Demonstrated strong understanding of front-end development fundamentals and visual design principles.

Student Result Management System

Language Used: C Programming
Description:

- Created a **Command-Line Interface (CLI)** based system to manage student academic records.
- Implemented features such as **adding**, **editing**, **searching**, **deleting**, and **displaying** student result data.
- Stored data using **file handling** in C, simulating a basic database for persistent storage.
- Designed menus and input validation to enhance user experience and ensure smooth navigation.

- This project reflects a deep understanding of core C programming concepts like structures, arrays, file I/O, and control flow.
